## Q3 SCREENING HAIR TREATMENT

A hair care procedure designed to form a protective shield that provides:

- Strengthening of the damaged hair structure
- Hydrolipidic balance repair
- Gloss, plus UV and heat protection
- Cumulative effect: the third treatment increases the level of protection to medium, and the fifth to high.

## • ARGAN OIL • MACADAMIA OIL • FLAX OIL

- One phase of the conditioner ensures intense hydration and detangles the hair.
- The other phase restores the hair's natural hydrolipid balance and evens out its structure.

- Avocado oil increases suppleness, and adds softness and silky feel.

- Camelia oil helps the hair retain moisture and improves protection of fragile and brittle hair.
- Violet pigments neutralize the unwanted yellow color nuance.

- Maintains the protective shield formed on the hair surface, providing amazing gloss.
- A UV-filter ensures additional heat and UV protection.
